

## Announcing CT-TachoTEK: Our best standalone digital tachograph analysis software... ever!

CT-TachoTEK digital tachograph analysis software, the latest version of our tried and tested Novadata TachoTEK, is the best yet!

And it's available to order now, in both Driver and Company Editions!

Now is the ideal time to start using CT-TachoTEK, as enforcement agencies are vigorously and actively requesting tachograph information from O Licence holders and carefully assessing their analysis solutions.

Small fleets are not exempt.

CT-TachoTEK is compliant with all current legislation and allows you to provide accurate data on request, reflecting your correct and compliant use of your digital tachograph equipment. This easy to use, standalone software is the ideal IT solution for any size of fleet, satisfying the exacting standards of the authorities.

Keep all your data from one or more vehicles securely on a single standalone computer, and enjoy a host of other benefits. In addition to all the features our many users have valued for years, such as prompts for download deadlines, 28-day infringement warnings, and a host of essential reports, we can now offer an option for remote downloading for all transport organisations, from single vehicles to small, medium and larger fleets alike.

No matter where the vehicle may be, at your base or out on the road, you can ensure that you meet all your deadlines, by using CT-TachoTEK in conjunction with our [new remote download device](#).

### **Driver edition – New feature!**

Driving without a card – flags up potential serious infringement

### **Company edition – New feature!**

Enhanced Working Time report – strengthens robust record keeping

CT-TachoTEK is backed by highly responsive expert support to help you address any issues swiftly.

Explore our new CT-TachoTEK software today, strengthen your compliance and help safeguard your O Licence.
